Invitation

Distinguished Colleagues & Dear Students,

It is our immense pleasure to invite you to the two days International Conference "Cells to Communities: Interlinking Life Sciences, Forestry, and Social Development" organized by the Department of Botany, IIS (deemed to be University), Jaipur on Feb. 5-6, 2026.

About Jaipur

Jaipur, the Pink City of India, is the chief attraction for visitors to Rajasthan. This city which is the capital of Rajasthan, casts an unusual spell on the traveller with its royal palaces, forts and monuments, revealing a historic past of chivalrous warriors, aristocratic royal, art & craft, literature as well as science. Handicrafts like miniature paintings, textiles, blue pottery and jewellery make it a shopper's paradise.

About the University

IIS (deemed to be University), Jaipur is among the pioneers in Rajasthan in imparting high quality education to women in different streams. It is known for excellence in delivering value-based education to students and encourages them to think innovatively in different walks of life. It particularly focuses on preparing students to become world ready citizens, who are abreast to take any professional and social challenges with an educated and empowered mind. The University offers UG, PG and Doctoral programmes in Arts, Science, Social Sciences, Commerce, Management, Computer Science & IT.

About the Department

Established in 1995, the Department of Botany has carved out its niche in the Environs of the University. The department offers Undergraduate, Postgraduate & Doctoral Programmes in Botany. Till date the department has organized four National Conferences and a National Seminar. We hope that this conference will be able to provide a platform for fruitful exchange of research ideas.

About the Conference

The International Conference on "**Cells to Communities: Interlinking Life Sciences, Forestry, and Social Development**" is an interdisciplinary platform exploring the connections between biological systems, ecosystems, societies, and technology. It emphasizes that sustainability originates at the cellular level and extends to the collective well-being of communities. The conference brings together researchers, academicians, policymakers, and practitioners to exchange ideas and foster collaboration for sustainable development. By linking laboratory research with field applications, the conference aims to address global challenges such as climate change, biodiversity loss, and inequality. It underscores the interdependence of nature and society, advancing education, participatory research, and collective action toward the UN Sustainable Development Goals and a resilient, equitable future.
