ABOUT CII Yi YUVA CLUB

Young Indians involves students from schools and colleges around the country to indulge them in leadership, personal development and nation building activities. Yi Students Net envisions connecting students to the community, the country at large and working towards a movement for “Nation Building”.

Young Indians (Yi) is an integral part of the Confederation of Indian Industry (CII), a non-government, not-for-profit, industry. Yi has around 1500 direct members in 32 chapters, and engages around 8300 students through student nets. Yi membership includes young progressive Indians between the age of 25 & 40 and comprises entrepreneurs, professionals and achievers from different walks of life. “To become the voice of Young Indians Globally” being the vision of Yi, it provides a platform for young Indians to participate and contribute. Yi’s work can be divided primarily into three groups; “Young Leadership” “Young Social Entrepreneurship” and “International Engagements”.

“Yi YUVA” is the name for Yi Youth Affairs vertical. Young Indians involve students from schools and colleges by forming “Chaupals” across various institutes around the country. Yi Yuva IIS Chaupal aims to synergize students and their energy for positive action. It provides an opportunity to start thinking and work for India. As a part of this net, Students work in cross functional teams with a broad objective of enhancing their leadership skills and giving back to the nation. In the process, they get opportunity for self-development, skill building, community service and nation building.

The Yi Chapter launched its first Yi Student NET with the IIS University in 19th September 2013. Mr. Rohit Verma, chair, Yi Jaipur Chapter and Dr. Ashok Gupta, Vice Chancellor, The IIS University, signed MOU for the same.

Summary/Description:	<p>CII Yi Yuva Club and Department of HRM of the University organized a visit to Gosil Exports for MBA Sem I students. Gosil Exports is a trusted and renowned name in the world of exquisite jewelry. This visit provided students with an opportunity to learn and enhance their knowledge about the Gems and jewelry industry. Students became aware about how designers create innovative jewelry that are aligned with history as well as how social and economic factors have influenced designing. They learnt how a raw material is made into a final product. In Gosil Industries, main source of raw material is wax and old thermocol glasses are also used through which jewelry is made. Students were explained about the importance of polishing in jewelry and several methods which are used in jewelry designing. During the visit, students observed that how much patience and handwork is required to make a single piece of jewelry. They got to learn how an industry performs its task and how the different departments work like CAD, Marketing, Production etc. Gosil Exports deals in both precious and non-precious stones and metals. The one thing that makes them different from other jewelry brands is their versatility in the designs. There were more than 500 workers working in this company. The process starts from designing, then a 3D image is created through software, and those designs are converted into the rubber/plastic molds and then if their clients pass the designs they are finally manufactured. Gosil Exports have a strong customers base in countries like America, European Countries etc.</p>
Outcome of the event	The visit increased understanding of students about functioning of an Industry
