DISTINGUISHED COLLEAGUES

It is our immense pleasure and privilege to invite you to the National Conference on 'Biodiversity Conservation for a Sustainable Future' which is being held at the IIS (deemed to be University) on 11-12 October, 2019.

As the human population increases so does the pressure on ecosystems, since we draw ever more resources from them. Our ecological footprint on the planet is unsustainable and will become unbearable unless we change our consumption patterns and our behaviour in general. The only option left is to manage productivity and resources in a sustainable manner reducing waste wherever possible using the principles of adaptive management and taking into account traditional knowledge which contributes to the maintenance of ecosystem services.

Education and public awareness programmes on conservation and sustainable use should be implemented and more effective methods of communication should be developed between and among stakeholders and managers. With a goal of raising awareness on the above listed objectives, we hope that conference will provide a robust and dynamic platform to the global community of professionals that includes Researchers, Botanists, Zoologists, Ecologists, Students, Environmentalists and Conservationists who are actively engaged in this field. We invite you to join this two Days National Conference in the beautiful city of Jaipur to discuss the need of biodiversity conservation for environmental sustainability.
